Column 1A - Each child is counted ONLY 1 time no matter how many Unilateral Removals the student had for any of the reasons in column B, C, or D. Also Column 1A total must match on all 4 tables. The total for this column MUST be the same on all 4 tables.

Column 1B, 1C, 1D - The grand total for these 3 columns will be equal to or greater than Column 1A.

Example: A student was removed 3 times for serious bodily injury. The student will be counted 1 time in column 1A and 3 times in column 1D. The total for this column MUST be the same on all 4 tables.

Column 2 - The student MUST be removed based on a Hearing Officer Determination to be placed in this column. The total for this column MUST be the same on all 4 tables. Report only Hearing Officers employed by Office for Dispute Resolution (ODR).

OUT-OF-SCHOOL SUSPENSIONS OR EXPULSIONS

Column 3A, 3B - Each child is counted ONLY 1 time no matter how many times the student was suspended or expelled. You must total the number of days the student was suspended or expelled and will count ONLY 1 time in column 3A if the total number of days is 10 days or less, or will count ONLY 1 time in column 3B if the total number of days is greater than 10 days. The total for columns 3A and 3B MUST be the same on all 4 tables.

IN-SCHOOL SUSPENSIONS

The total for columns 4C and 4D MUST be the same on all 4 tables.

DISCIPLINARY REMOVALS

Column 5A - This is the TOTAL number of removals.

Example: A student was suspended 3 different times for 5 days each. The student will be counted as 3 removals in column 5A and counted 1 time in column 5D because the total number of days was greater than 10.

Column 5B, 5C, 5D - Each child is counted ONLY 1 time no matter how many times the student was removed. You must total the number of days the student was removed and will count ONLY 1 time in column 5B if the total number of days is 1, or will count ONLY 1 time in column 5C if the total number of days is between 2 to 10 days, or will count ONLY 1 time in column 5D if the total number of days is greater than 10 days. All export files will be sent to PSU in zip format. All files sent to PSU should be zipped into one file. The naming convention of the file should be IUxx_date zip where ‘xx’ is equal to the IU number and ‘date’ is equal to the date the file was send in the format mmddyyyy.

The student file due July 9, 2009 will be a revised December 1 count to include children who were missed in December (and should have been in the count), exit information with a date prior to 12/1/2008 for those students who should be deleted from the December count, exit information for those children who exited between December 1, 2008 and June 30, 2009, and gifted students not included in the December 1 count.

At the request of each Intermediate Unit, PSU will send each IU a copy of the final file they sent to PSU in January after all data has been checked and verified. The file will be in Excel format.

***** Once student record files from all IUs have passed all edit checks by PSU, each IU will receive an Excel spreadsheet, via email, listing students in their export file that have the same Last Name, First Name, and Birth Date as students in other IU files. Contained in the email will be instructions on how to resolve these duplicates and a deadline.**

Appendix C: Export Specifications

Introduction

The Bureau of Special Education Data Collection and Reporting System managed by the Pennsylvania State Data Center, Penn State Harrisburg, collects student data in a specified format for the generation of federal and state reports. Pennsylvania Intermediate Units supply the individual student records and the required supplemental tables specified in this Resource Guide. Appendix D details the format of the data export files for submission to Penn State.

Sign off and validation of data – December 1 count

The Intermediate Units will ensure at the time of data submission that the export files that have been sent to the Pennsylvania State Data Center are true and accurate. The Intermediate Units will provide PSU with a count of the number of children contained in the export file. This can be incorporated as part of the message sent with the export file. Once all IU files are accepted as correct, PSU will run the duplicate check program and send each IU a list of their possible duplicates for correction. Once all duplicates are resolved, PSU will send the following reports to each IU for verification: Verify 1 by IU (children age 2-21 with disabilities receiving Special Education), Verify 1 by SD (children age 2-21 with disabilities receiving Special Education), Verify 2 (Home Districts by eligible exceptionality - school age only), and Verify 3 (preschool student by Age). Upon review of the data, a sign-off will be required from all intermediate units. The IU Director will need to sign the final sign-off.

Sign off and validation of data – July Submission

The Intermediate Units will ensure at the time of data submission that the student database file and the supplemental tables that have been sent to the Pennsylvania State Data Center are true and accurate. **The Intermediate Units will provide PSU with a count of the number of children contained in the student database file including the number of additions, deletions and the number of children who exited. This can be incorporated as part of the message sent with the export file.** Once all IU files are accepted as correct, PSU will run the duplicate check program and send each IU a list of their possible duplicates for correction. Once all duplicates are resolved, PSU will send the following reports to each IU for verification: Verify 1 by IU (children age 2-21 with disabilities receiving Special Education), Verify 1 by SD (children age 2-21 with disabilities receiving Special Education), Verify 2 by IU (Home Districts by eligible exceptionality - school age only), Verify 3 by LEA (preschool student by Age) and Table 1 through Table 13. Upon review of the data, a sign-off will be required from all intermediate units. The IU Director will need to sign the final sign-off.

Duplicate resolution

Intermediate units are responsible for resolving duplicate student records within their IU before submitting child count export files to PSU. After receiving export files from all IUs, PSU will identify possible duplicate student records across IUs and will send back a list of these students to relevant IUs via email. The email with the list of possible duplicate student records across IUs will contain instructions and a time frame for resolving the duplicates. Intermediate units will determine if the child should be included in their file. After all duplicates across IUs have been resolved, PSU will send verify reports to each of the IUs. Upon review of the data, a sign-off will be required from all IUs. The IU Director will need to sign the final sign-off.

Corrections and updates of data during reporting phase

PSU will notify any Intermediate Units of data that needs to be corrected. The entire export file will be sent back to the IU for corrections to be made. If after submission of data to the PSU and before the deadline for submitting data, an IU may submit a corrected or updated version of their database.

Confidentiality

The PSU team assures that the information received from the IUs will be kept confidential.

Intermediate Units data responsibilities

The intermediate units will be responsible for the accuracy of the data that is sent to PSU. PSU will check for duplicates across Intermediate Units and for missing data. If there is missing data, PSU will send the file back to the IU for corrections.

Edit Checks IUs must perform prior to submission

- The file must only have 32 data fields and 31 commas per record.
- The file should contain only records for students who have a valid IEP on December 1, 2008
- No extra spaces at the end of each line.
- Spaces are not allowed as place holders for blank values. For example, if there is no Middle Initial the field should be left blank and not filled with a space.
- Special characters (such as parentheses and quotation marks) are not allowed unless otherwise noted in the Data Item definition.
- Middle initial must be 1 character only - error example "M." or Thomas."
- Parentheses are not allowed in last name field - error example "Smith (Jones)".
- Jr., III in name field are allowed with a space after the last name and no punctuation. Example – "Smith Jr"
- Nicknames with quotation marks are not allowed in first name field – error example Thomas "TJ".
- Format the date fields as MMDDYYYY, for example – 02011990
- Include leading zeroes for all fields that require leading zeroes.
- Home District (Item 13) of any student must fall within the boundaries of the IU reporting the student
- All Home Districts which fall within the IU boundaries must report students or send a verification stating that there are no students with a valid IEP on December 1, 2008.
- Students in facilities listed in Appendix A of the Resource Guide should only be reported by Corrections (IU 31)
- Items 27-30 must be completed for all children in EI
- If Disability (Item 10) is Developmental Delay, then student must be in an EI program
- If a student is 14 years of age or older, is not Gifted, and Services Plan for Students in Non-Public Schools (Item 25) is blank, then there must be an entry in Transition (Item 24)
- If Disability (Item 10) is Gifted then Amount of Special Education (Item 18) and Type of Support (Item 19) must be gifted
- The following items may be left blank for Gifted without disability students (Code 05 in Item 10): Services Plan for Students in Non-Public Schools (Item 25), Transition (Item 24), and LRE Category (Item 20)
- For Gifted without disability students (Code 05 in Item 10), the secondary disability (item 11) must be blank.

- If Educational Environment (Item 20) is 01 (Approved Private School – Non-residential) or 02 (Approved Private School – Residential) then the Service Provider (Item 17) must be an APS.
- A warning flag will be sent for students whose age is more or less than 3 years different than the appropriate age for the grade. For example if a 2nd grade student is age 12 the IU will be asked to please check to make sure the birth date and the grade of the student are correct.
- If the Neighborhood School is Student is Attending Neighborhood School (Code 01 in Item 26) then Educational Environment (Item 20) must be code 19, 20 or 21 (student being educated in regular buildings).
- All Home Districts which fall within the IU boundaries must be reported on all tables.
- Table changes of greater than or less than 20% from the previous year will be flagged and sent to the IU for verification and justification. Zero values may also be flagged for verification and justification.

Adhoc Reports

Adhoc reports may be requested of PSU by the Department of Education, Bureau of Special Education. All requests for reports must be submitted through BSE. PSU will complete the reports in a timely manner and send them to BSE. The reports will be in either Excel or Access format.

Timeline

The intermediate units shall follow the timeline in Appendix B of the Resource Guide. (Reminder: December 1 count deadline is **December 12, 2008**. The revised count database and the supplemental tables are due on **July 9, 2009**.) The Pennsylvania State Data Center will accept preliminary files until **December 8, 2008**. **The PSU encourages Intermediate Units to send files in early December so that all errors will be corrected by the final file deadline of December 12, 2008.**

Export Specifications - Details

The specifications include information for submission of the individual records and the supplemental tables that need to be submitted to PSU by the intermediate units. In addition, each Intermediate Unit is required to send monthly preschool aggregate data please view the Preschool Resource Guide for specific information.

The export files are to be sent to Pennsylvania State Data Center. They may be sent either via email to **penndata@psu.edu** or mailed to:

Penn Data 2008
 Pennsylvania State Data Center
 Penn State Harrisburg
 777 West Harrisburg Pike
 Middletown, PA 17057

This appendix is to be used in conjunction with the rest of the **Penn Data 2008-09 Resource Guide**, which details the data variables, data tables, timeline and data dictionary.

General Formatting Information (for all export files – student database and Supplemental Tables)

All data export files must be in standard ASCII comma-separated variable (CSV) format, sometimes called “comma delimited text.” The data files shall consist of rows of integer data separated by commas. For the student database, data Item 22, Related Services/Supplementary and Item 24, Transition for which multiple responses are allowed, a semi-colon (;) will separate the data variable within the data item. There must be no blank rows in the file; each line of the file will be treated as a row of data. For each blank data value make sure there is a comma to indicate a move to the next data value. There must be a total of 31 commas for each row of data. Each line must be terminated by a carriage return and line feed combination. Files shall be named as indicated in this document, and must be in an MS-DOS compatible file format.

A sample of the student database data format is shown below for a fictional file called SAMPLE.TXT.

```
123456789,Smith,John,A,01011993,,01,01,,101000000,JohnDoeElementary,1234,,21,1,02,,,,,19,85,03,01,,,Black,01;02;04;06,,
```

This file will contain a row of data for each student. The row contains 32 values, each separated by a comma (for a total of 31 commas per row). If there is not a value, a comma will indicate a value of ‘blank’. Be sure to include leading zeros. Data should be formatted as MMDDYYYY.

A sample of the supplemental table (**Table**) data format is shown below for a fictional file called SAMPLE2.TXT. If the value is zero include the zero and NOT a value of ‘blank’.

```
111111111,0,1,0,3,4,5,6,7  
222222222,2,4,0,0,0,5,6,10  
333333333,3,4,5,6,3,0,0,0
```

For this file, there are three rows of data and each row contains 9 values, the 1st value is the AUN.

Transmission of Files

Intermediate Units must submit the files to the system using one of two methods:

1. Electronic mail

Intermediate Units may email the files to the system administrator (penndata@psu.edu). The files must be sent to this address as electronic attachments to the email message, not in the body of the message. The files must be encoded using Internet standard MIME format (not Bin Hex or UUEncoded). Files should be named according to the format indicated in this document and **zipped into a single file** with the naming convention IU**_Date.zip, where “**” is equal to the IU number and “Date” is equal to the current date in MMDDYYYY format (i.e., 02012003). Files that are not formatted in accordance with this specification will be returned to the sender for correction. The sender must include their name, address, telephone number and email address with all correspondence.

2. Floppy Disk or CD-Rom

Intermediate Units may place the files on a floppy disk or CD-Rom and mail the disk to the system administrator (at the address listed above). The disk formatting must be MS-DOS compatible (if using a Macintosh, please write the files to a floppy disk using hardware/software that creates an MS-DOS compatible disk). Files should be named according to the format indicated in this document. The Intermediate Unit must mail the disk at a minimum of 5 days prior to the due date of the file.

File Formats

The following section contains the formats and names for the student database and the preschool database. **Once final specifications are available for the supplemental tables, PSU will send to each IU and place on the web the documentations for the tables.**

Data Assumptions

1. All students will be counted by their home district.
2. APS students will be included unless otherwise noted.
3. Wards of State will be counted as a "Home District" in each IU.

Student Database

The student database contains one record for each student who had a valid IEP on **December 1, 2008**. This includes all students in the Early Intervention and School Age programs. Each child will be counted in accordance to the specifications listed in the Resource Guide. Each record will include exactly 32 data items with each data item separated by a comma (total 31 commas per line). For data Item 22, Related Services/Supplementary Aids and Services and data Item 24, Transition, for which multiple resources are allowed, a semi-colon (;) will separate the data variables within the data item. Each record (or row) in the file represents a unique student. The last date to submit the initial count file to PSU via export file is **December 12, 2008**. The revised count file must be submitted to the PSU via export file by **July 9, 2009**.

The PSU encourages Intermediate Units to send test files in early December 2008 to help alleviate errors in the final submission.

Appendix F: Guidelines for Calculating Educational Environment

Importance of Accurate Educational Environment Reporting

Every state is required to provide an annual report of specific data related to the education of students with disabilities to the U.S. Department of Education. In Pennsylvania, this information is gathered through the PennData reporting system. Data are compiled by the Pennsylvania Department of Education (PDE), Bureau of Special Education (BSE), verified for accuracy and forwarded to the Office of Special Education Programs (OSEP) at the U.S. Department of Education within required timelines.

The Individuals with Disabilities Education Act of 2004 (IDEA 2004), Pennsylvania's State Performance Plan (SPP), and the Gaskin Settlement Agreement have heightened the need for accurate reporting of Educational Environment data. Educational Environment data from each student's Individualized Education Program (IEP) are compiled by the Local Education Agency (LEA) and reported to their respective intermediate unit (IU) for verification of accuracy, and then reported to the PDE/BSE via the PennData reporting system. If Educational Environment data are not reported accurately by the IEP team, the LEA data may not reflect an accurate representation of the LEA's Educational Environment. Inaccurate data reporting may result in negative results for the LEA such as adverse reporting on the Special Education Data Reports as not meeting SPP targets, resulting in possible negative determination status and misidentification for LRE Monitoring.

Identifying Environment

Educational Environment reporting is not an indication of the amount of special education service that a student with a disability receives. Following are the fundamental principles for reporting educational environments:

- If a student is physically placed within an educational environment where students without disabilities are receiving instruction, it is a regular education setting.
- Instruction that occurs outside the classroom, such as within the school or community where interaction occurs with persons without disabilities and includes nondisabled peers and community members is a regular education setting.
- If a student is educated outside a regular school building for more than 50 percent of the day, is receiving instruction in an Approved Private School, Private, Other Public, Hospital/Homebound, Correctional, or Out of State Facility, or Instruction Conducted in the Home, it is considered an other setting.

PennData Reporting: Educational Environment - Section VIII of the IEP Form

There are two parts to Section VIII of the IEP. Each IEP team must select only ONE Educational Environment for the student, and complete either Section A or Section B. As a reference, approximately 96 percent of students with disabilities in Pennsylvania are educated in regular school buildings with nondisabled peers, thus reported in Section A.

VIII. PennData Reporting: Educational Environment (Complete either Section A or B; Select only one Educational Environment)

To calculate the percentage of time inside the regular classroom, divide the number of hours the student spends inside the regular classroom by the total number of hours in the school day (including lunch, recess, and study periods). The result is then multiplied by 100.

Section A: For Students Educated in Regular School Buildings with Nondisabled Peers - Indicate the Percentage of time INSIDE the regular classroom for this student:

Time spent outside the regular classroom receiving services unrelated to the student’s disability (e.g., time receiving ESL services) should be considered time inside the regular classroom. Educational time spent in age-appropriate community-based settings that include individuals with and without disabilities, such as college campuses or vocational sites, should be counted as time spent inside the regular classroom.

Calculation for This Student:

Column 1	Column 2	Calculation	Indicate Percentage	Percentage Category
Total hours the student spends in the regular education classroom per day	Total hours in a typical school day (including lunch, recess, and study periods)	(Hours inside regular classroom ÷ hours in school day) x 100 = % (Column 1 ÷ Column 2) x 100 = %	Section A: The percentage of time child spends inside the regular classroom:	Using the calculation result - select the appropriate percentage category
			_____ % of the day	<input type="checkbox"/> INSIDE the regular classroom 80% or more of the day <input type="checkbox"/> INSIDE the regular classroom 79-40% of the day <input type="checkbox"/> INSIDE the regular classroom less than 40% of the day

Section B: This section required only for students educated OUTSIDE regular school buildings for more than 50 percent of the day - select and indicate the name of school or facility on the line corresponding with the appropriate selection: (If a student spends less than 50 percent of the day in one of these locations, the IEP team must do the calculation in Section A.)

EXAMPLES for Section A: How to Calculate PennData–Educational Environment Percentages

	Column 1 Total hours the student spends in the regular education classroom per day	Column 2 Total hours in a typical school day (including lunch, recess & study periods)	Calculation (Hours inside regular classroom ÷ hours in school day) × 100 = % (Column 1 ÷ Column 2) × 100 = %	Indicate Percentage Section A: The percentage of time child spends inside the regular classroom:
Example 1	5.5	6.5	(5.5 ÷ 6.5) × 100 = 85%	85% of the day(Inside 80% or more of day)
Example 2	3	5	(3 ÷ 5) × 100 = 60%	60% of the day(Inside 79-40% of day)
Example 3	1	5	(1 ÷ 5) × 100 = 20%	20% of the day(Inside less than 40% of day)

**Examples of Educational Environments:
Guidance for IEP Teams**

Example	Rationale for Consideration of Environment	How to report this time on the IEP?
Regular classroom all day with 1:1 paraeducator support provided to student 100% of day	Paraeducator support is an IEP team decision related to the specially designed instruction that a student needs. It does not impact Educational Environment calculation or reporting.	Complete Section A.
Student receives specialized instruction in a full-time special education classroom, taught by special education teacher	This is special education delivered physically outside of the regular education environment.	Complete Section A.
Speech therapy delivered in separate therapy room	This is special education delivered physically outside of the regular education environment.	Complete Section A.
Integrated speech therapy within regular classroom, provided by speech and language therapist	This is special education delivered inside the regular education environment.	Complete Section A.
General education classroom with co-teaching	Co-teaching is an instructional strategy that is provided to all children inside the regular education environment.	Complete Section A.
Alternative Education program - "regular education" if the students with disabilities and nondisabled peers are educated in the program	An alternative education environment that includes both students with disabilities and nondisabled students is a regular education environment.	Complete Section A.

Example	Rationale for Consideration of Environment	How to report this time on the IEP?
Educational time spent in age-appropriate, community-based setting, which includes individuals with and without disabilities (e.g., vocational sites, supermarkets, colleges)	Time spent in community environments with nondisabled peers and community members is a regular education environment.	Complete Section A.
Correctional facilities	Students are not being educated in regular schools.	Complete Section B. Not applicable to time calculated in regular buildings. Write the name of the correctional facility in the space provided.
One-on-one orientation and mobility instruction in halls and stairs of regular education school building with vision therapist.	Considered regular education.	Complete Section A.
Recess with nondisabled students	Recess is part of the school day and participation alongside nondisabled students is a regular education environment.	Complete Section A.
Recess with only students with IEPs	Since no regular education students participate, this activity is a special education activity outside the regular education environment.	Complete Section A.
Peer buddies visit the special education classroom	Even though students without disabilities are physically within the special education classroom, the instruction is still performed by a special education teacher in a special education setting.	Complete Section A.

Example	Rationale for Consideration of Environment	How to report this time on the IEP?
Field trips	Field trips do not occur as part of the typical school day schedule for students.	This does not impact Educational Environment reporting.
Flexible grouping (e.g., for reading instruction)	Flexible grouping is an instructional strategy that does not impact Educational Environment reporting as long as groupings are based on skill levels of all students, with and without disabilities.	Complete Section A.
Instruction Conducted in the Home	Instruction Conducted in the Home is the most restrictive setting along the special education continuum of services.	Complete Section B.
Students engaged in job training in sites within the school setting	Training in actual work settings is considered regular education.	Complete Section A.
Instruction in a sheltered workshop	This is a segregated setting.	If the student is in this setting more than 50 percent of the time, complete Section B of the IEP, checking the box denoting "other public facility, nonresidential." If the student is in this setting less than 50 percent of the time, complete Section A.
Lunch in the cafeteria	Lunch is part of the school day and there are opportunities to interact with students without disabilities.	Complete Section A.

Example	Rationale for Consideration of Environment	How to report this time on the IEP?
Lunch in special education classroom with students with IEPs	Lunch is part of the school day; however, because there are no opportunities to interact with students without disabilities, the student is outside the regular education environment.	Complete Section A.
Other locations (e.g., APSs, Public Separate Facilities)	These settings are not regular school buildings.	If the student is in this setting more than 50 percent of the time, complete Section B of the IEP, checking the box denoting "other public facility, nonresidential." If the student is in this setting less than 50 percent of the time, complete Section A.
Charter Schools	Charter schools are considered LEAs, thus considered regular education school buildings.	Complete Section A.
Cyber Charter Schools	Cyber Charter schools are considered LEAs. This is considered the same environment in which students without disabilities are enrolled.	Complete Section A.

Reminder: Section A of the IEP is completed for students educated in regular buildings with students without disabilities. Statewide, this group represents approximately 96 percent of all students with IEPs. Section B is completed for students educated outside regular school buildings more than 50 percent of the day.
